

Racism runs as an extraction algorithm. This is the circuit diagram.

Five centuries of policy, read as one machine. This book derives the extraction kernel from the historical record, calibrates it against 146 anchor cases, and states the conditions under which it fails.

WHAT IS ON THE COVER

The Theodore Transform

Carry a claim across domains: the gendered axis to the racial, social mechanics to electrodynamics. Invariance is the test.

The Complex Wage

$W = \psi_m + j\psi_s$. The material wage is real and does work; the status wage is imaginary and does none.

The Predatory Min-Max Function

$\max \mathcal{E}$ subject to $M_{\text{eff}} < \tau$, over five tiers E, P, F, I, O. Extraction runs at the ceiling, resistance is held below it.

The Unified Lorentz Force

The material field does real work. The cultural field only deflects, and transfers no energy at all.

The Driven Oscillator

A reform impulse rings and decays inside the reactive components. The envelope is bounded by design.

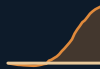

Enclosure Capacitance

$C = \epsilon A/d$. The partition as a gap: charge accumulates above it while the out-group is held at ground potential.

The Extraction Chart

Every passive load sits inside the unit disk. The center is total enclosure; the rim is withdrawn compliance.

The Reparations Integral

$\mathcal{R} = \int \text{Re}[V \cdot I^*] d\tau$. The debt is an area. Plotted: output produced and not paid out, 1948–2022.

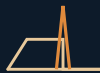

The Parasitic Control Layer

The Elite gate a supply they do not generate. A trickle of base current routes the whole of V_{cc} .

The Crash Condition

$dM/dt > d\Sigma/dt$. When coherence outruns suppression, the system crosses τ and fails.

Inductive Kickback

Cut the current and the coil answers with a spike. Backlash is a reactive transient, and it decays.

The Phase Kick

The argument moves and the amplitude does not. A pivot re-times the signal without paying anything.

EMMANUEL THEODORE derives the framework from set theory, discrete mathematics and electrodynamics, and tests it against the archive.
