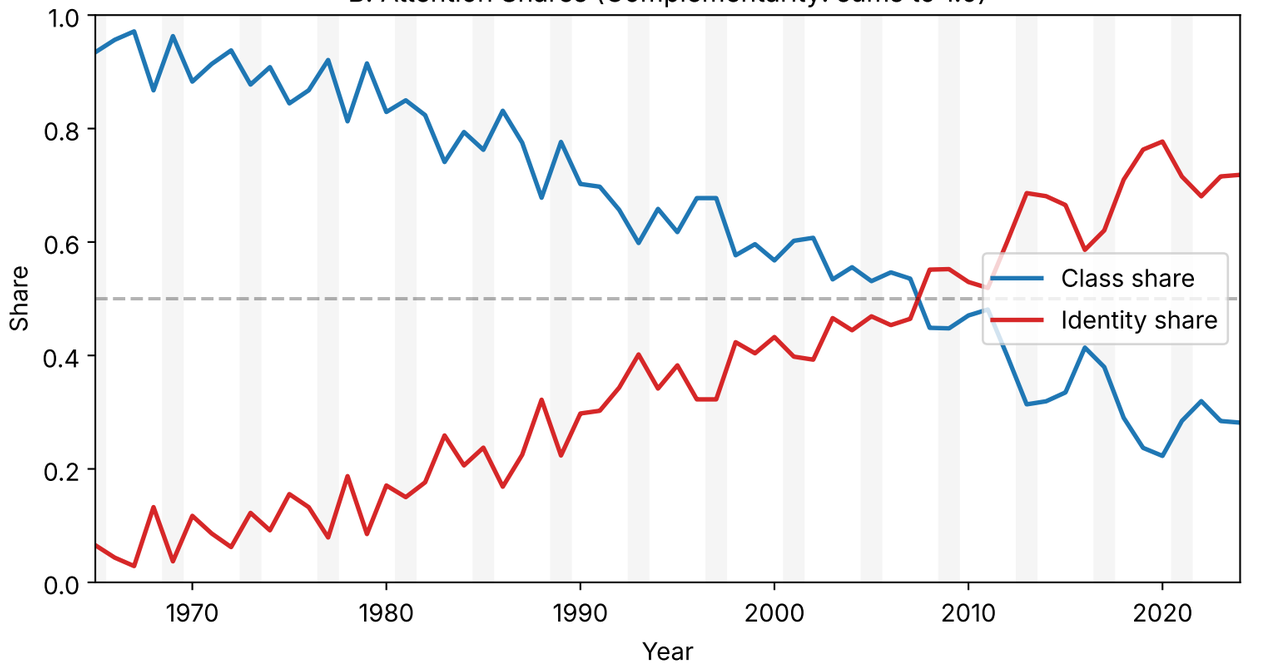
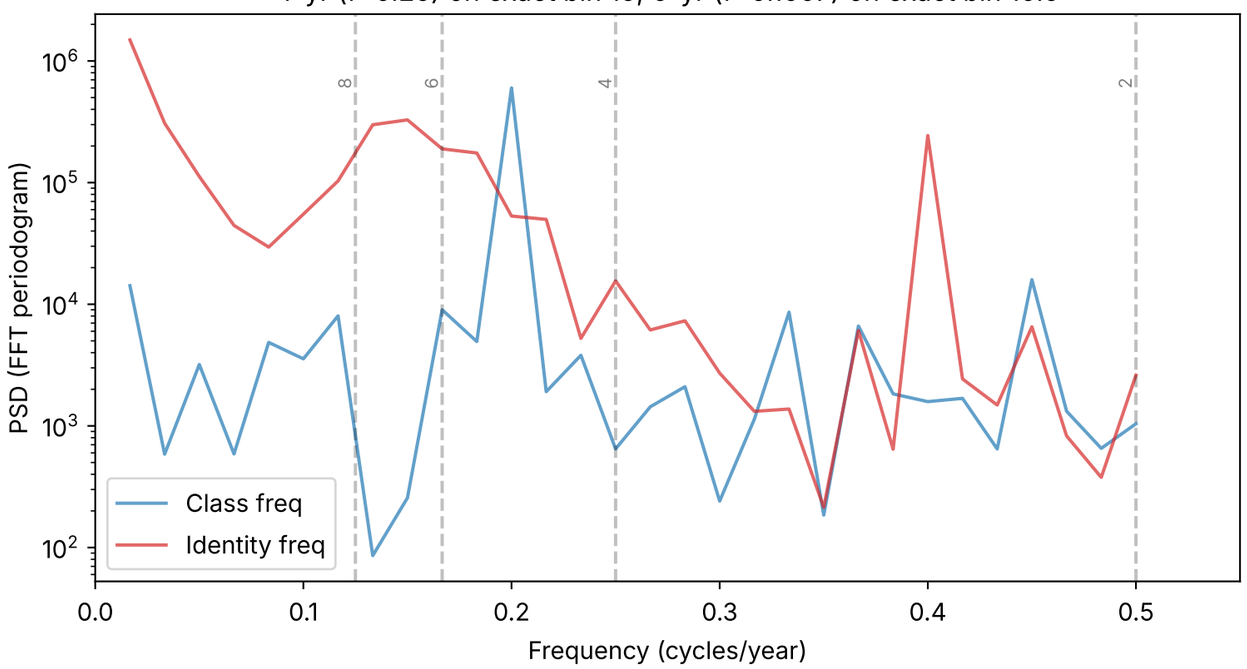
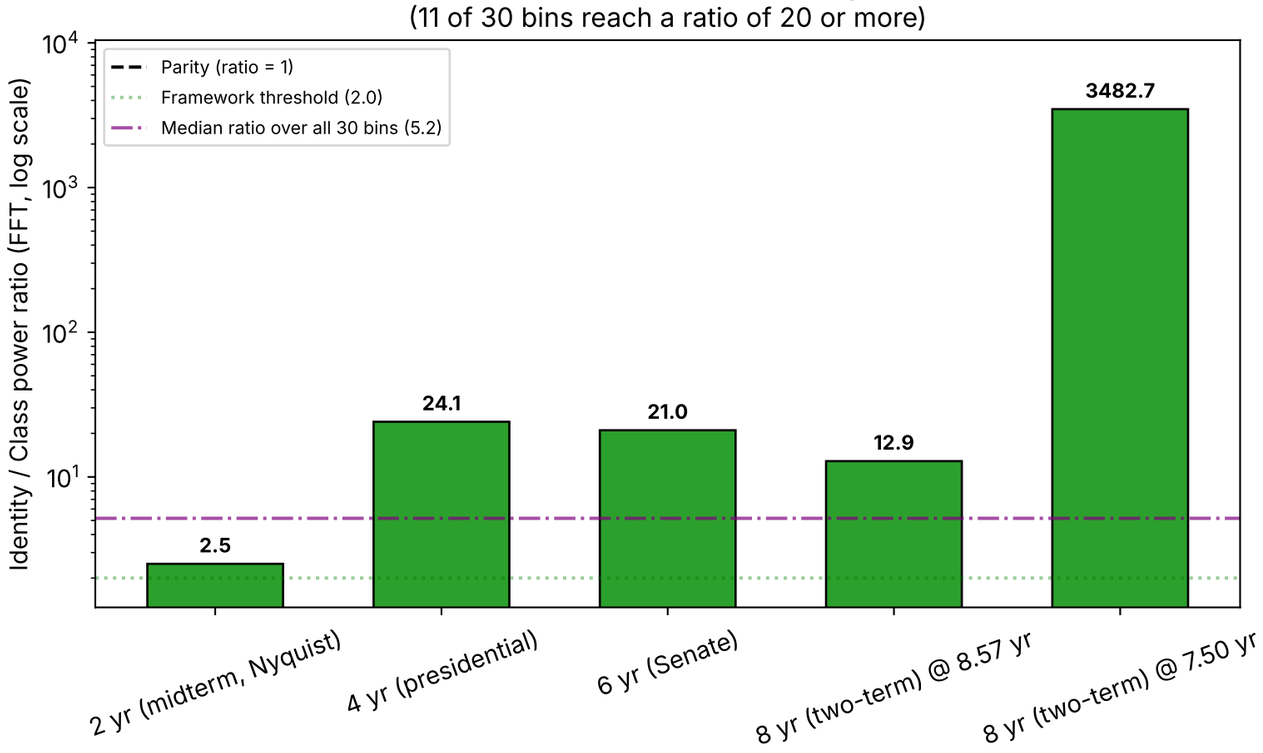
A. Absolute Word Frequencies (Congressional Record, 1965-2024)
Class word freq
Identity word freq
Annual word count
Year



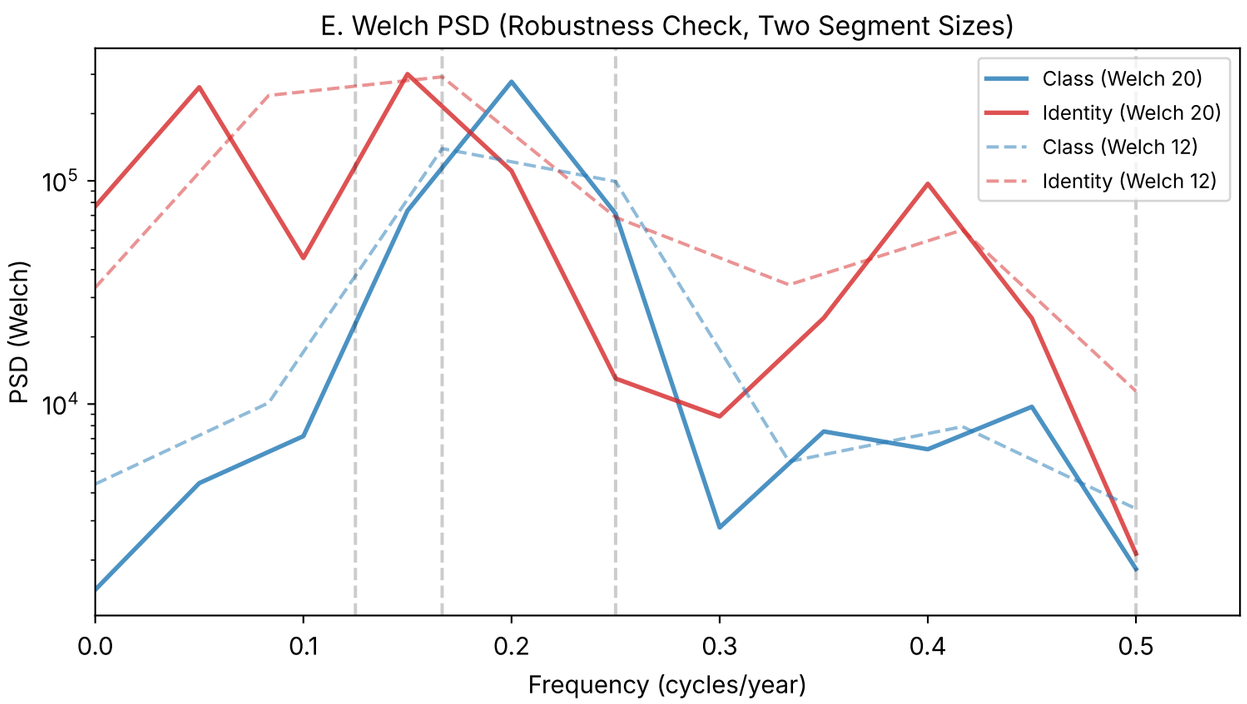
B. Attention Shares (Complementarity: sums to 1.0)
Class share
Identity share
Share
Year



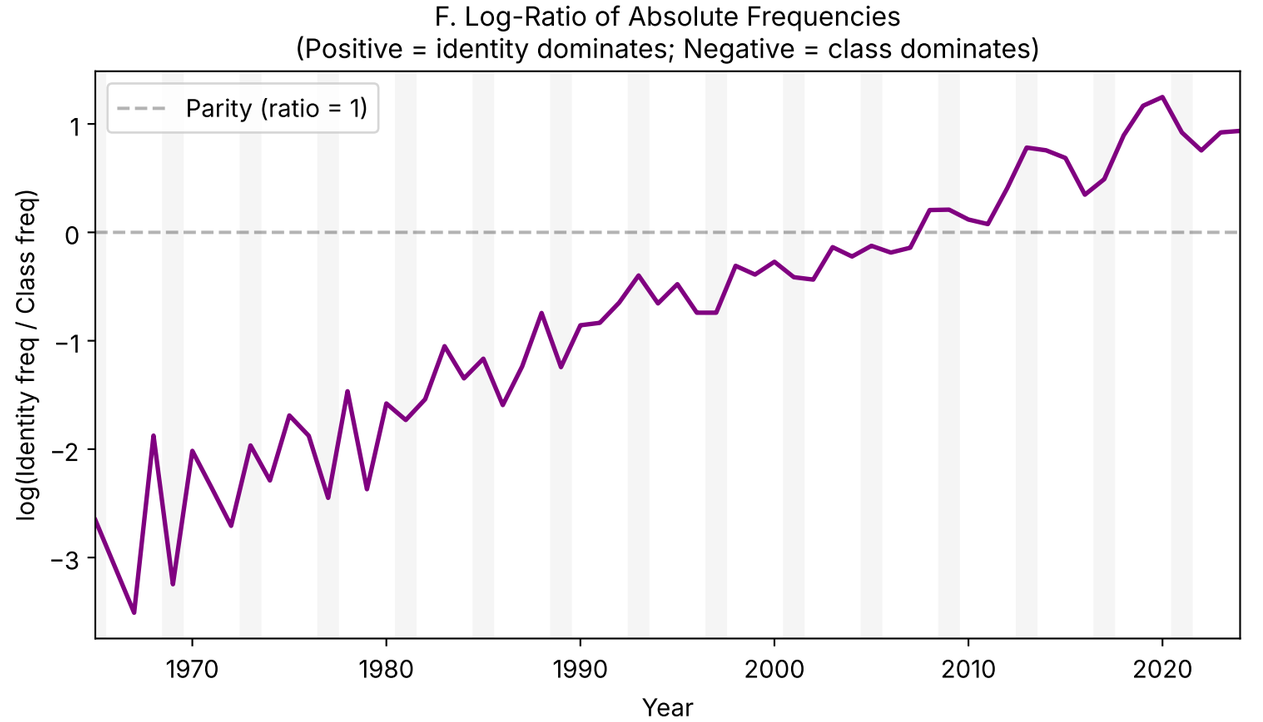
C. FFT Periodogram (Detrended Absolute Frequencies)
4-yr (f=0.25) on exact bin 15; 6-yr (f=0.1667) on exact bin 10.0
Class freq
Identity freq
PSD (FFT periodogram)
Frequency (cycles/year)



D. FFT Power Ratios at Electoral Cycles
(11 of 30 bins reach a ratio of 20 or more)
Parity (ratio = 1)
Framework threshold (2.0)
Median ratio over all 30 bins (5.2)
Identity / Class power ratio (FFT, log scale)
2.5
24.1
21.0
12.9
3482.7
2 yr (midterm, Nyquist)
4 yr (presidential)
6 yr (Senate)
8 yr (two-term) @ 8.57 yr
8 yr (two-term) @ 7.50 yr



E. Welch PSD (Robustness Check, Two Segment Sizes)
Class (Welch 20)
Identity (Welch 20)
Class (Welch 12)
Identity (Welch 12)
PSD (Welch)
Frequency (cycles/year)



F. Log-Ratio of Absolute Frequencies
(Positive = identity dominates; Negative = class dominates)
Parity (ratio = 1)
log(Identity freq / Class freq)
Year
